PUBLIC FORUM

Susan Hart of Hamlin Center Rd. was present to speak on the Star Exemption that was not on her taxes and she had filed a form. She came in last year upon closing and submitted a form to someone in the Assessor's Office that was given to her by her attorney. This year she found no star savings on her taxes costing her at least \$600.00. She stated no receipt was given last year when she turned it in and this year no receipt was given when she did it again. Assessor Melanie Fahmer explained the process within her office and that they handle hundreds of exemptions a year. We just don't have time to give receipts. The Assessor also noted the year on her forms as it had a purple highlight and returned to her as it was not complete. Melanie Fahmer also explained the time of public inspections of her records noting human errors can happen. Mrs. Hart asked if she needed to come in and check once again this year to see if it was done. This was a lot of money and very upsetting to me. Town Supervisor Warner explained this is the first time in four and half years that he heard of a problem. He asked for the boards input as Mrs. Hart asked about a credit as a compromise. Councilperson Rose asked Melanie if this was possible, she stated no. Town Supervisor Warner stated he would get back to her in two weeks.

No one else wished to speak therefore, the public forum was closed.

PUBLIC HEARING ON LOCAL LAW #3-2004 Senior Citizen Zoning

Town Supervisor Warner opened the public hearing for Local Law #3-2004. Attorney O'Toole representing a Senior Citizen project stated they have concerns on the proposed local law and offered an alternative explaining the intent for zero lot line and lot coverage. Regarding the setback requirements this proposed law has front 35 feet and 15 feet on side. Unionville in Hilton is 25 front and side 5'. If you do that why would Seniors come to Hamlin. He states the quality of life for seniors would be different as far as taxes and in marketing the project would be a huge issue. We will also address Councilperson Rose's concern for work with the DPW and drainage. With a common area, we can give the town more access and we can place them accordingly. We will not have the sheds to work around as they won't need them with your requirement of a two car garage. The next item addressed is the Home Owners Association and the fee. Many Seniors won't be able to qualify as that is factored in so they will go to Unionville. Attorney O'Toole stated they want to cluster the houses closer. If the density remains constant you don't lose any green spaces. It also means we can sell a more competitive house than the one in Hilton and the Seniors can afford to live here. He thanked the board for their consideration.

Town Supervisor Warner asked if there were any comments from the public. Peter Tonery of Moscow Rd. spoke positive on this senior project as being one that Hamlin needs and this is a positive step for the community.

Tom Jensen complimented the Town Board and Planning Board on the nice job and spoke positive on the new proposed setbacks and the project being able to bring people closer together.

Harry Petor of 2811 Roosevelt spoke on drainage problems with culverts and hoped with this project there will not be problems. The Town Supervisor assured him that the Planning Board will have to address any drainage if this particular project goes forward.

Tammy Palumbo from the Conservation Board stated she walked the property with Jim Doan and noticed some drainage around a pie shape area in the lower part. When she mentioned how this code came about Town Supervisor Warner mentioned they looked at several towns and came up with this proposal.

Ed Doan of Redman Rd. asked if there was going to be a Recreation Hall for socializing. Attorney O'Toole stated for this particular concept we have not yet decided. Steve Lipson asked about street lighting and was told yes there would be some.

James Breslawski Planning Board Chairman mentioned the applicant could ask for the houses to be closer and have a green area by way of a variance but that the code is a starting point and an applicant should come in and if needed go to the Zoning Board for relief. James Krempasky of 1960 Redman Rd. stated the ink isn't dry and people are already talking about zoning variances. Mr. Breslawski stated I didn't say they need a variance; we should try using the code that was worked on and didn't agree with the smaller setbacks. James Krempasky thought it was good use of land.

Dane Emens of the Planning Board said it is a positive and good starting point. Judy Hazen of the Planning Board agreed with the new code and the new project similar to Unionville was a good idea.

Peter Tonery raised the issue of a Community Center with the developer stating they haven't talked about that as of yet. Jim Nesbitt stated we spent a lot of time working on this code. We looked at the Zoning Code and not at a particular project.

Town Supervisor Warner asked the Town Board was asked for their comments. Councilperson Hollink mentioned the 25 foot setback and how many cars would fit in the driveway, two side by side was the estimate given.

Councilperson Rath stated he agreed with the presentation on lot coverage and Building Codes as well as the Homeowners Association.

Councilperson Rose mentioned having no problem with this proposal but at first had mixed emotions. He did state the setback requirements for R-H being 7 ½ feet side setbacks.

Attorney Horowitz who was sitting in for Attorney Licht mentioned clustering and town authorization to the Planning Board for a Section 278.

Public Hearing was declared closed at 7:50pm
